

# Storey Creek Club Fitting Program

## Step 1

Schedule a time when you wish to demo ALL the clubs in the category you are interested in replacing. This might be Drivers, Fairway Woods, Hybrids, Irons, Wedges or Putters. Choose just one category at a time and take your time with the process.

## Step 2

Describe to the Pro Shop Staff your current equipment: Shaft Flex, Driver loft, 7 iron distance, Handedness, Average score, The Improvements you're searching for. If you are in the store, they will also do a static fitting to help with length and lie angle. Our Staff will then prepare as many demo models as are available for you. March through October we have the best selection.

## Step 3

During your time demoing the equipment create a:

- Good Pile (I'm interested in this club)
- Bad Pile (I never want to touch this club again!)
- Make sure the Pro Shop Staff person records each of the 'Good Pile' models upon completion.

## Step 4

Schedule a time with one of our experienced and certified Club Fitters. The club fitter will utilise our FlightScope Launch Monitor during your fitting and record each of your strikes. Together, we will move between models, heads, shafts, lie angles, lofts and lengths to determine what improvements can help you **PLAY YOUR BEST**.

## Step 5

At the end of the process, the Club Fitter will quote a competitive price for the equipment. If you place the order, then no Club Fitting fee is charged. If you require time to consider, then a club fitting fee of \$60/per hr is charged. This fee will be credited against the cost of an equipment purchase if an order is placed within 30 days of the Club Fitting.

For those that don't choose the Club Fitting Program:

### **Demo Equipment Policy - \$40 charge to demo each piece of equipment**

Customers are encouraged to retain their receipts. Customers will be refunded the demo charges upon purchase of **new** equipment if within 30 days of demo.

Storey Creek Members are exempt from this \$40 Demo charge.
